Slurry Engineering High Performance CB Mixing System

High Shear Bentonite Mixer and Bentonite Storage Tank Farm

Grout Plant and Silo for Pre-Mixing Cements with Water

Scaled Bentonite and Grout Batching Tanks for precision and auto-batching

Metered Chemical Additive System

High Shear Dual Tank CB Blending System

Mass Flowmeter for Continuous Density Measurement of Batch

Mag Flowmeter 4" for Measuring Pumped Slurry Volume and Rates

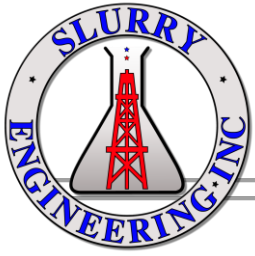

Data Recorder for Automatic Measurement of all Batching, Flows, Density and Custom Parameters

Nominal Grout Plant Output: 60 gpm/18 cu. yd./hr.

Typical Bentonite to Grout Ratios: 4-7

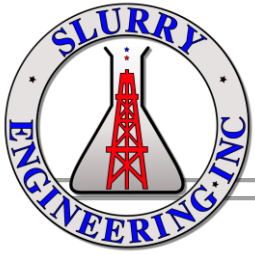

Typical CB Output: 90 – 120 cu. yd./hr.
